|-------------------|---------------|
| OEM               | UNIMAC-GHERRI |
| Model             | Pasteuriser   |
| Country of origin | Italy         |

### Description:

Suitable for the thermal treatment of products with a pH lower than 4.5, contained in jars, bottles, cans.

The range includes various models\* covering a production up to 80,000 cph.

Each step of the thermal cycle can be customized in terms of temperature and treatment time to perfectly suit the product characteristics.

The pasteurisers - coolers can be equipped with a final blowing section to remove any water drops from the containers and ease labelling.

Modular construction to make transport easier.
